2024 Product Catalogue

VSN Video Wall Controllers Mission Critical Installations

VSN V3

Scalable and ultra-secure video wall controller

Video Wall Controller

The Datapath VSN V3 processor system is our most powerful and efficient video wall controller to date. The V3 generation introduces the latest technology in power efficiency and system cooling, with chassis enhancements to improve airflow and simplify system maintenance

VSN400N

Video Wall Controller

The Datapath VSN400N is a video wall controller designed for video wall and multi-screen display installations that require a balanced number of video captures and video outputs. The VSN400N has been developed and optimised to operate with the latest generation of our world-leading PCI Express graphics and video capture cards, providing flexible solutions throughout the professional AV industry.

VSNMicro 600

Video Wall Controller

The VSNMicro 600 is designed for environments where noise and space do not allow the presence of server racks. Offering a fully customisable, small footprint and almost silent system, the VSN-Micro 600 has options available for different Intel processors, hard drives and memory configurations.

VSN Video Wall Controller

Video Wall Processors

Aligo

4K AVoIP with KVM

Aetria Workstation

Software

Aetria is the ultimate control room solution in mission critical environments. It encompasses workstations, video wall controls, allowing full access and control of all networked sources. Using 4K AVoIP and KVM, operator workstations can control applications via a single keyboard and mouse. Aetria also allows the integration of third-party systems with existing legacy and future applications, making it a flexible, scalable, and future-proof solution.

To craft your bespoke control room and meet the unique demands of your installation, consult with one our Datapath solutions experts so you can scope out a project and provide a detailed breakdown of the hardware and software you need. Datapath's commissioning services we'll ensure your new installation is up and running smoothly.

Aetria

A Complete Networked Solution

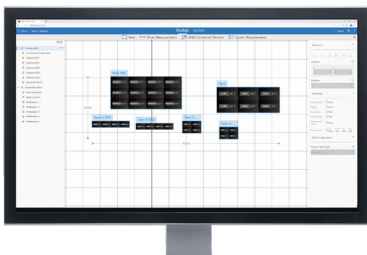

EXCELLENCE BY DESIGN

Aetria Designer

Dedicated design software for Aetria solutions

Software

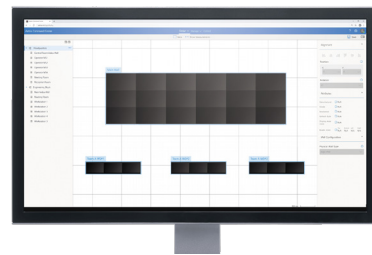

Dedicated design software for Aetria solutions. Aetria Designer makes it easy to create, review and approve designs anytime, anywhere.

Aetria Command Center

Comprehensive and unified interface

Software

The unified interface for system integrators to design, manage and operate control rooms solutions.

Aetria Network Manager

Aetria Network Manager is pre-configured with Aetria Command Center and is fully compatible with Aetria Workstation, Arqa, and Aligo.

Hardware

The Aetria Network Manager appliance is provided pre-configured with Aetria Command Center to simplify the setup and management of Aetria solutions.

Aetria WallControl

Powered by Datapath's proven video wall technology, Aetria WallControl enables seamless integration of video walls into the Aetria system.

Hardware

Aetria WallControl runs on a Datapath VSN controller to connect Aetria to a video wall, enabling seamless integration of video walls into the Aetria ecosystem.
