

AirMedia[®] 2

The fastest, easiest, most manageable, and secure wireless presentation technology

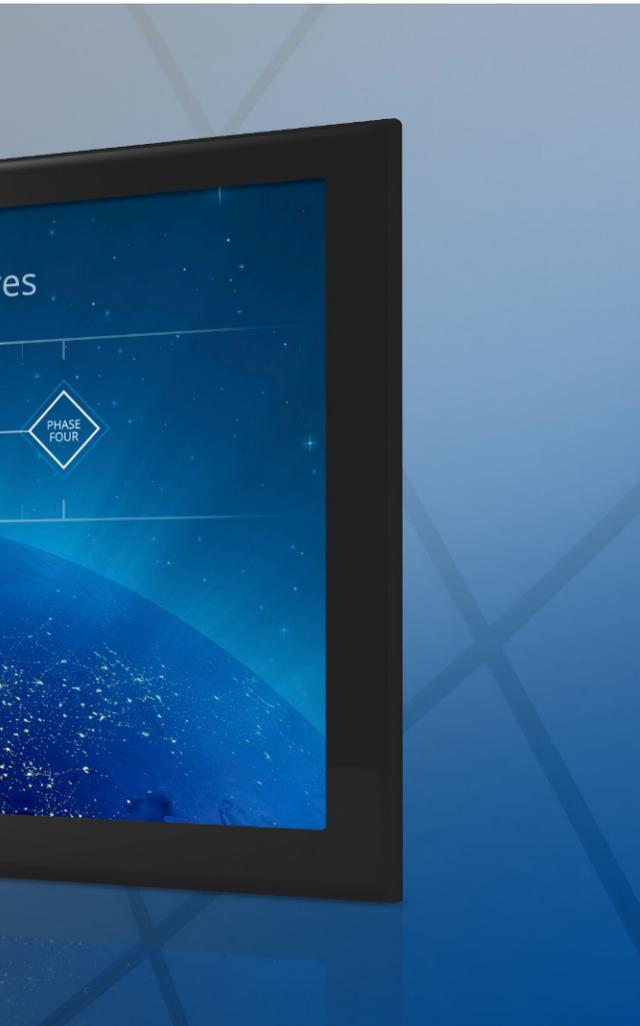

Why wireless presentation?

Open meeting spaces and huddle spaces are proliferating, and the latest laptops and smart devices no longer feature ports for wired connectivity. This has created the need for a very simple and fast wireless presentation technology. AirMedia® 2.0 meets that need. It frees people to sit or stand anywhere in the room or space and easily connect their smart devices and laptops to the room display, regardless of operating system. No more wires or dongles cluttering the table. In fact, you don't even need a table.

All the advantages of an enterprise-grade appliance

While other products provide just a wireless access point, exposing your confidential content to potential security breaches, AirMedia 2.0 is a network-based wireless presentation technology that leverages the latest security protocols:

- 802.1x network access control
- Active Directory® user authentication
- AES-128 content encryption
- SSH, SSL, TLS, and HTTPS

Additionally, most people leave meetings without disconnecting their device from the wireless gateway. As a result, private or sensitive information is still visible on the display when the next group of people enters the room. AirMedia automatically disconnects your device from the wireless gateway to safeguard sensitive content.

Room Presentation System

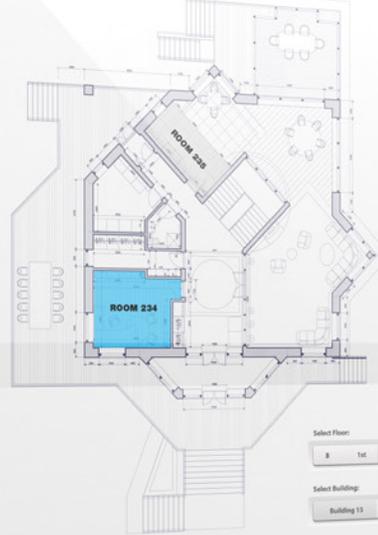

Welcome to the Crestron room presentation system. Please select the room in which you are presenting. If you already have the application installed, please select "Present!", otherwise select "Run-in-place" and run the application.

AirMedia 2.0 key features

- Lowest bandwidth consumption for optimal network efficiency
- Lowest latency so keyboard and mouse movements track in real-time
- Silky-smooth video playback
- Enterprise-grade network security
- Easy cloud-based provisioning and management
- Full mirroring with Windows®, Mac®, Android™, and iOS® without Bonjour®
- On-screen display with connectivity instructions; plus room availability and meeting details when connected to calendaring platform
- Native support for Appspace® digital signage

Consistent user experience in every room and space

With AirMedia 2.0, there's no more wasting valuable time figuring out how to get the technology in the room or space to work. With a consistent, simple, and intuitive user experience from the network-deployed app, guest app, or native device app, all you have to do is show up and start presenting.

Managed on the network

AirMedia 2.0 supports cloud-based deployment, configuration, and management from Crestron XiO Cloud, providing maximum scalability and uptime. The AirMedia 2.0 app can be silently deployed to laptops and smart devices across the enterprise. This ensures that everyone in your organization is ready and able to connect to any approved AirMedia 2.0 device with just a single mouse click.

AirMedia 2.0 is built into our most popular presentation solutions

AirMedia 2.0 gives you total flexibility to meet the needs of every space. It's available in two new AirMedia Presentation Systems. AirMedia 2.0 capability is also built into our powerful, award-winning, and industry-leading DigitalMedia™ all-in-one 4K presentation systems and Crestron Mercury®, the only open UC solution.

AirMedia family of products

AirMedia 2.0 capability built-in

Crestron Mercury

AirMedia 2.0 capability built-in

Open space

Increase workflow and facilitate collaboration by turning lobbies, lounges, and other open spaces into productive meeting spaces. Crestron AirMedia Presentation Systems (AM-200 and AM-300) mount invisibly behind wall mount displays and enables wired or wireless presentation. No furniture, dongles, or new Wi-Fi® networks needed.

Single source, single display room

Crestron Mercury is perfect for single source, single display rooms. It enables wired and wireless presentation, SIP and Bluetooth® conference calls, and supports any video conferencing service.

Multi-source / single display room

The DMPS3-4K-250-C DigitalMedia Presentation System provides in-room wired and wireless presentation capability all in one, and is the perfect fit for multi-source rooms with just a single display.

Multi-source / dual display room

The DMPS3-4K-350-C DigitalMedia™ Presentation System provides in-room wired and wireless presentation capability all in one to empower larger meetings in multi-source presentation and video conferencing rooms with dual displays.
